PROFESSIONAL EXPERIENCE

Field Training – Karume Institute of Science and Technology (KIST), Zanzibar

Two months – Internet of Things (IoT) & Server Configuration

- **Server configuration:** configured new Debian-based workstation computers as servers after OS installation, so that hardware and software components were arranged to run efficiently and reliably
- Named servers using the KIST convention and numbered them in sequence to track the total number of public IP addresses available
- Updated the operating system and virtual partitions for the AI1, AI2 and AI3 servers (network category) to resolve a network detection and connection fault
- **Authentication:** authenticated computers to the KIST network by assigning domain names and restarting them while connected, and by running the *gpupdate /force* command followed by a restart
- Worked within the organisation's network security setup, including the *ufw* (Uncomplicated Firewall) rules that control which traffic is allowed or restricted
- Configured a Raspberry Pi 5 and installed the Linux operating system
- Built and deployed a chatbot using Streamlit and Streamlit Cloud
