TECHNICAL & FINANCIAL PROPOSAL | HIMA-PR-2026-SBC-01

Client Deadline Tracker: Automated Reminder and Monitoring System for Shariya Business Consultancy

A web system that reminds the right staff member before every client deadline, escalates anything overdue, and shows management at a glance which closings are done and which are not.

TOTAL PROJECT PRICE

TZS 2,800,000
Two phases, delivered over 10 weeks

DATE

Zanzibar, Tanzania | 10 October 2026
Valid for 30 days

1. BACKGROUND AND CHALLENGE

Shariya Business Consultancy supports businesses with account and financial services, audits, monthly and annual financial reports, firm and company registration, and TIN/ZRA compliance. Many of these services carry fixed, recurring deadlines for each client company.

Today those deadlines are tracked from memory and informal notes. As the client list grows, some closings are missed by management and staff alike. There is also no single place to see which closings are done, which are late, and who is responsible for each.

Missed deadlines
Late filings can bring penalties for the client and damage SBC's reputation.

No clear ownership
Without a named person per closing, follow-up depends on whoever remembers.

No visibility
Management cannot see at a glance what is overdue or who is behind.

2. OBJECTIVES

- **Zero missed deadlines:** every client closing is reminded automatically, in good time.
- **Clear accountability:** every closing is assigned to one named staff member, with a full history of who did what and when.
- **Instant visibility:** management can answer "what is overdue and who owns it?" in under ten seconds.

3. PROPOSED SOLUTION

One secure web system, used on phone and computer, that stores every client's deadlines and acts on them automatically.

> **Register clients & obligations → Deadlines generated each period → WhatsApp/SMS reminders → Staff marks closed with proof → Dashboard & weekly summary to management**

1 **Register once**

SBC enters each client and what they must close (for example monthly financial report, annual return, ZRA filing), how often, and by which day.

2 **Deadlines generate themselves**

Each period the system creates the next closing automatically and assigns it to the responsible staff member.

3 **Reminders go out automatically**

Every morning at 08:00 the system sends WhatsApp reminders 30, 7 and 1 days before, and on the due date. If WhatsApp fails, the reminder is sent by SMS.

4 **Late work is escalated**

Once a closing is overdue, both the staff member and management receive a daily alert until it is closed.

5 **Closing takes one tap**

Each reminder carries a direct link. The staff member marks the closing done, adds a reference number or uploads proof, and the reminders stop.

6 **Management sees everything**

A colour-coded dashboard (red overdue, amber due soon, green closed), per-staff performance, and a weekly summary every Monday morning.

4. SYSTEM MODULES

Module	What it does	Phase
Users and roles	Secure login. **Admin** (management) sees and manages everything; **Staff** see and act on their assigned closings.	1
Clients	Client company records: name, contact person, phone, email, notes.	1
Obligations	Recurring closing rules per client: title, frequency (monthly, quarterly, annual, one-off), due day, default staff member, reminder days.	1
Reminder engine	Daily automatic job: generates closings, sends reminders, escalates overdue items, never sends the same reminder twice.	1
Reminder log	Record of every message sent, by which channel, and whether it was delivered.	1
Dashboard	Counters (overdue, due in 7 days, closed this month) and the full closings list, filterable by staff, client, status and period.	2
My closings	Each staff member's own list, sorted by due date, with a large "Mark closed" button. Designed for mobile.	2
Staff performance	One row per staff member: open, overdue, closed on time, closed late.	2
Proof and activity log	Uploaded receipts or reference numbers per closing; history of every status change.	2
Reports and settings	Weekly summary, export to Excel/PDF, Swahili/English interface, message templates, automatic backups.	2

5. TECHNOLOGY AND ARCHITECTURE

USERS	Management (Admin) · Staff on phone or computer
WEB APPLICATION	Next.js + TypeScript · Tailwind CSS · Mobile-first screens · Swahili / English
REMINDER ENGINE	Daily scheduled job (08:00 EAT) · Escalation rules · Weekly summary
MESSAGING	WhatsApp Business Cloud API · SMS gateway (fallback) · Email (optional)
DATA	MongoDB database · Secure file storage for proof uploads · Daily backups
SECURITY	HTTPS / SSL · Role-based access · Encrypted passwords · Full audit trail

The system runs on a cloud server with SSL and can be served from a subdomain such as *tracker.shariyaconsultancy.com*. All software used is open source; there are no licence fees.

6. SCOPE

Included

- All modules listed in Section 4, deployed live with SSL.
- Set-up of WhatsApp Business messaging templates and the SMS fallback.
- Import of SBC's existing client and deadline list (from Excel or a similar format).
- User guide and hands-on training for management and staff.
- 30 days of free bug-fix support after final handover.

Not included (can be quoted separately)

- A self-service portal for SBC's client companies.
- Billing or invoicing features.
- Direct integration with TRA, ZRA or other government filing systems.

7. WORK PLAN (10 WEEKS)

Phase 1 goes live at the end of Week 4, so SBC benefits from reminders while Phase 2 is being built. The pilot period confirms the reminder rules with real clients before the dashboard is finalised.

Activity	1	2	3	4	5	6	7	8	9	10
Requirements workshop with SBC, system design	●									
Foundation: login, roles, database	●	●								
Clients and obligations module		●	●							
Reminder engine, WhatsApp/SMS integration			●	●						
Phase 1 go-live and staff onboarding				●						
Pilot with real clients (reminders running)					●	●	●	●		
Monitoring dashboard and My closings					●	●	●			
Staff performance, activity log, uploads, weekly summary							●	●		
Swahili/English, Excel/PDF export, backups									●	
Final testing, training, handover									●	●

8. FINANCIAL PROPOSAL

No.	Deliverable	Phase	Amount (TZS)
1	Requirements analysis and system design: confirm closing types, frequencies and reminder rules with SBC	1	200,000
2	Foundation: secure login, admin and staff roles, database set-up	1	300,000
3	Clients and obligations module with automatic deadline generation	1	400,000
4	Reminder engine: daily job, WhatsApp and SMS integration, one-tap "Mark closed" link, overdue escalation, reminder log	1	600,000
5	Monitoring dashboard: colour-coded closings list, filters, counters, "My closings" screen	2	500,000
6	Accountability: staff performance view, activity log, proof-of-closing uploads, weekly summary	2	400,000
7	Swahili/English interface, export to Excel/PDF, automatic backups	2	200,000
8	Testing, live deployment with SSL, data import, user guide and staff training	2	200,000
	Phase 1 subtotal		**1,500,000**
	Phase 2 subtotal		**1,300,000**
	TOTAL PROJECT PRICE		**2,800,000**

Amount in words: Tanzanian Shillings Two Million Eight Hundred Thousand only.

9. PAYMENT SCHEDULE

Milestone	Week	% of phase	Amount (TZS)
Phase 1 advance, on acceptance of this proposal	0	60%	900,000
Phase 1 balance, on go-live of the reminder engine	4	40%	600,000
Phase 2 advance, on start of Phase 2	5	60%	780,000
Phase 2 balance, on final handover and training	10	40%	520,000
TOTAL			**2,800,000**

10. RUNNING COSTS (PAID BY SBC)

These costs are not part of the project price. They are paid to the service providers once the system is live; HIMMA Technologies will set up the accounts in SBC's name.

Item	Indicative cost
Cloud server hosting, SSL and daily backups	TZS 450,000 per year
WhatsApp Business messages (Meta, per message) and SMS credits	Pay-as-you-go, depending on the number of clients and reminders
Optional maintenance and support after the 30-day warranty	Quoted on request

11. WHAT WE NEED FROM SBC

- The current list of clients and their deadlines (Excel, notebook or any format).
- The types of closing to track and how often each client closes (monthly, quarterly, annual).
- The list of staff who will use the system, with phone numbers and emails.
- How many days before a deadline reminders should start, and the preferred language for messages.
- A business phone number and Facebook Business account for WhatsApp messaging (we will guide the set-up).
- One contact person at SBC for questions and approvals during the project.

12. TERMS

- Prices are in Tanzanian Shillings (TZS).
- Work begins on receipt of the Phase 1 advance payment.
- Source code and all data belong to SBC after final payment.
- This proposal is valid for thirty (30) days from 10 October 2026.
- Payment to: Bank Transfer (NMB Bank, Account Name: Usama Talib Juma, Account No: 23410061995) or M-Pesa (+255 749 113 092, Usama Talib Juma), on behalf of HIMMA Technologies.

13. ACCEPTANCE

By signing below, SBC accepts this proposal and authorises HIMMA Technologies to begin Phase 1.
